Dinnertime for penguins:
Penguins eat seafood for their dinner. For dinner they will eat krill, krill is just like shrimp. Krill is a much clearer kind of shrimp. Penguins also eat squid and fish.

Here are some facts about these adorable creatures.

1. All seventeen species of penguins are found exclusively in the Southern Hemisphere.
2. Emperor penguins are the tallest species, standing nearly 4 feet tall. The smallest is the little blue penguin, which is only about 16 inches.
3. The fastest species is the Gentoo penguin, which can reach swimming speeds up to 22 miles per hour.
4. A penguins striking color is a matter of camouflage, its black back blends into the murky depths of the ocean. From below, its belly is hidden against the bright surface.

Boys Basketball: Hood vs. Lincoln Thompson

Newspaper club went to watch the basketball game on January 18th against Lincoln Thompson. We arrived right before halftime to cheer on the Hawks. Mr. Kurkle was the referee. It was an exciting game and there was a lot of fast-paced dribbling up and down the court. Both teams played really well. "They're really good!" said Annyeliz. The Hood Hawks made a lot of really close shots. Bella, who plays on the girls' basketball team, commented on their coach, Mrs. Brown. "She's really nice and very good at basketball. They must work really hard at practice. They're good at dribbling and playing well," Bella said. At halftime, everyone was hopeful for a Hood Hawk victory! It was a really close game, but we lost by only 2 points. It was a fascinating game!

Valentine's Day: The Holiday of Love

Valentine's Day was on Tuesday February 14, 2017. Valentine's Day started as a celebration by several early Christians who were all named *Valentinus*. The holiday was first connected with love in the Middle Ages.

On Valentine's Day you can spend time with loved ones and even buy something special for them, such as roses or chocolate. It is a wonderful holiday and all of us at the newspaper club hope you have a great one!
