Dear Parents & Guardians,

This letter is to inform you of issues surrounding “vaping”/“juuling.” (using e-cigarettes). Thurgood Marshall Middle School would like to share information about vaping with our parents & guardians. Vaping is a serious concern for teens across the country. There are misconceptions that it is a “healthy” alternative to smoking when in fact it carries its own risks. Please see these resources and contact us with any questions.

**Facts:**

- Purchase of these devices is prohibited in MA under the age of 21.
- Several different substances can be inhaled through these devices:
  - PG(propylene glycol) and VG (vegetable glycerin) base, flavorings, and possibly nicotine
  - Dry herbs, often THC/marijuana
- Use also exposes the lungs to a variety of chemicals, including those added to e-liquids, and other chemicals produced during the heating/vaporizing process.
- “The aerosol from e-cigarettes is not harmless. It can contain harmful and potentially harmful chemicals, including nicotine; ultrafine particles that can be inhaled deep into the lungs; flavoring such diacetyl, a chemical linked to a serious lung disease; volatile organic compounds such as benzene, which is found in car exhaust; and heavy metals, such as nickel, tin, and lead.” e-cigarettes.surgeongeneral.gov
- Teens are at higher risk for vaping/nicotine use to affect the development of brain circuits that control attention and learning, as well as the development of mood disorders and issues with impulse control.

Below are photos of different kinds of vaping devices:

Thank you for partnering with us on this important topic of public interest. We will continue to work to educate our students in all aspects of adolescent development.

Best wishes,

Molly Cohen
Principal
