LCHS Community Message 9/30/2022

Good morning Classical Families,

I am reaching out to update you after meeting with Inspectional Services yesterday regarding the construction around the building. At the end of the summer, we had a roof leak that affected one of our classrooms. When we surveyed the damage, we found some mold, so the city employed roofers, engineers, and mold specialists to ensure any mold is removed. We have moved that classroom to the school library which is set up with technology to support continued learning for students. Out of an abundance of caution, inspectional services are inspecting any areas that historically had involved water to ensure that if these areas have any mold that it will be removed. ISD and the construction companies are working in the evening daily to take care of this issue and they are using hospital grade air filtration in any areas that are open during that construction. Any areas that are occupied by staff and students during the day where work has happened will be enclosed so it is safe for occupancy. I also have to thank the staff and students for how
flexible and gracious they have been around space and change. As always, we thank you for your patience as we work together to keep our community safe and healthy!

Thank you,

Amy Dunn
